

Highlights of the GRIFS project

GRIFS Forum meeting
Beijing, 17 November 2009

Stephane Pique, GS1

Workshops & Forum events

- Workshops held
 - *18 June 2008, Brussels*
 - *30 June 2008, Halifax, UK*
 - *26 September 2008, Tokyo*
 - *4 December 2008, Hong Kong*
 - *19 February 2009, Brussels*
- Forum events
 - *30 June & 1 July 2009, Washington DC*
 - 17 November 2009, Beijing
 - 19 November 2009, Seoul
 - 2 & 3 February 2010, Brussels

Feedback from workshop participants

- Co-ordination is needed
- MoU is the right level
- User participation is required
- Willingness to participate

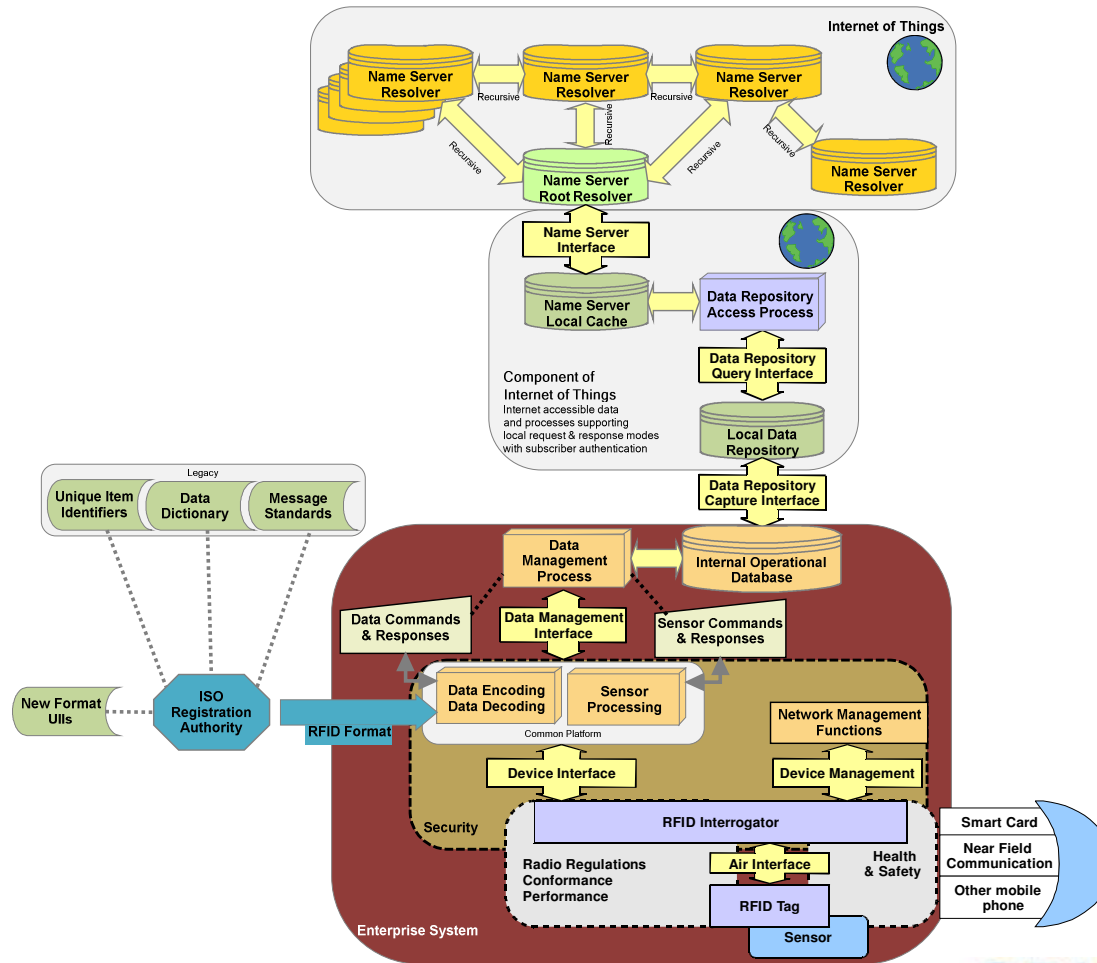

Washington DC Forum

- 30th June: open meeting
- 1st July 2009: First Forum meeting
- Representatives from ISO, ITU, IEEE, uID Center, AIM Global, AIAG, ODETTE in addition to ETSI, CEN and GS1
- Confirm desire to collaborate with ITU-T JCA-NID
- Dissociate standards database maintenance from MoU

Standards Overview

GRIFS Standards Report

- Over 200 pages
- Describes over 125 standards
- Description of issues requiring coordination
- New version to be released by end 2009

The Standards Database

Supported by

Welcome

Welcome to **the RFID Standards Database!**

Here you can find up-to-date information on RFID standards. To make it easier to search the database, each standard is classified in three main categories:

- The area of application**, i.e. to which hardware or software area it is related
- The organization** that published the standard
- Its **current status**, whether it has already been published or is still under development

You can search the database using the above criteria at [the standards browser page](#). Additionally, you will find descriptions of each standard category and publishing organization on separate pages.

This portal has been based on the [RFID Standardisation State of the art Report](#), created within the EU-supported project GRIFS.

The Standards Database

- Work Group Secretariats are primary editors
- Decentralised maintenance
- Opportunity to publicise the Work Group activities
- Need to nominate editors for areas where MoUs do not exist
- Goal is to have a continually and accurately update

MoU Feedback

- Presentations
 - Workshops in Halifax, Tokyo and Hong Kong
 - Open teleconference
- Feedback
 - Co-ordination is needed
 - MoU is the right level
 - User participation is required
 - Willingness to participate

MoU Principles

- Based on the Electronic Business MoU between IEC, ISO, ITU and UN/ECE
 - Focus on facilitation of effective standardisation
 - Recommend action to participant organisations
 - No change to existing standards development process
 - Decisions by consensus
 - Agree to share plans and activities
 - Involvement of user groups

MoU Participant Responsibilities

- a) Coordination of the standardization work programme within the scope of the MoU
- b) Monitoring the implementation of recommendations by Participants
- c) Monitoring the results of harmonization efforts undertaken by other groups within the scope of the MoU
- d) Approving the procedures for any joint projects established under the MoU
- e) Proposing to the Participants changes as necessary to the MoU to reflect emerging requirements
- f) All expert groups of each Participant shall allow authorised, competent experts of the other Participants to participate in their work

MoU Deliverables

- Publish minutes of meetings
- Publish an annual report
- Run an annual open meeting

Be involved

- Keep Informed
